Editorial

It is with immense pleasure that I am writing this editorial article to the journal of 'CLINICS IN SURGERY' which has been outlined with the purpose of providing worldwide healthcare professionals and scientific researchers with the breakthrough progress and advances in the field of surgery. I feel honored to be able to contribute in developing a scientific outlook online for upcoming researchers and budding clinical surgery enthusiasts. This effort has been put to not just avail new information but also to extensively dive and indulge in an experience of its kind. CLINICS IN SURGERY' is an international, multifaceted, meticulously peer-reviewed online journal that works as an online center for delivering path breaking discoveries in the field of clinical surgery and research. It also works as a hub in creating a platform for important view exchange and discussions addressing previously published articles as well keeping in mind a larger audience. Our timely editions will include novice and authentic concepts, native ideas, mini reviews, case studies, short notes, article discussions and any work that covers aspects in clinical surgery and research. Alongside, our esteemed journal will incorporate topics related to

- Clinical science research;
- Analysis of epidemiology,
- Legal, ethical and regulatory affairs,
- Bio-medical science ethics,
- Quality assurance issues pertaining to clinical trials;
- Comprehensive assessment of related benefits and ill-effects and its impact on society;
- In-detail evaluation of the future of surgery in developing countries.

Every article submitted to this journal will be subjected to meticulous peer-review by a distinguished group of editorial members that will ensure high standards and firm ethical policies of an academic journal. So, here is an open invitation to all the budding researchers out there to submit your ideas, concepts, thoughts and views and join us in understanding the future of clinical surgery and research. Welcome Aboard!!!
