

Editorial: CSJ

Chunfeng Zhao*

Department of Orthopedic Surgery, Mayo Clinic, USA

Editorial

Orthopaedic is one of the most important fields in medicine that deals with musculoskeletal problems in clinical practice, education, and research. This field is becoming even more important in our aging society. *Clinics in Surgery Journal (CSJ)* is a peer reviewed open access mega journal focusing on novel clinical interventions, summarizing clinical experience, surgical case reports, explore research innovations, and promoting new technologies in the field of orthopedics. As a peer reviewed journal, *CSJ* commits to provide a platform for dissemination of novel surgical technologies, unusual, unique and rare clinical cases and images to enhance the clinical understanding of disease and to convey important clinical information. Editors of *CSJ* would like to invite clinicians and scientists across the world to submit their studies and results from perspective of clinical, translational or basic science research to the *CSJ*, and we would be pleased to help to promote your research to publication.
